QUESTIONS
Exercise 8-4 - Grafting/Budding

1) What is the difference between grafting and budding.

2) What is the basic prerequisite (underlying principle) for a successful graft/bud union?

3) Why are monocots not grafted or budded?

4) What determines the terminology of what a grafting or budding method is called?

5) Was your attempt at a T-bud successful? If not, why do you think it failed?
